

Zombie Duck!

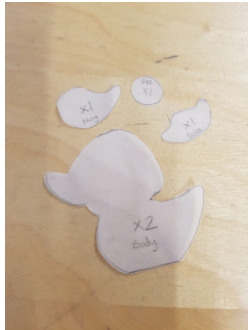

What you need:

- Felt: yellow, beige, black and white
- Needle
- Thread: yellow, red and black
- Pins or fabric glue
- White beads
- Tracing paper
- Pencil
- Stuffing
- Keyring (optional)

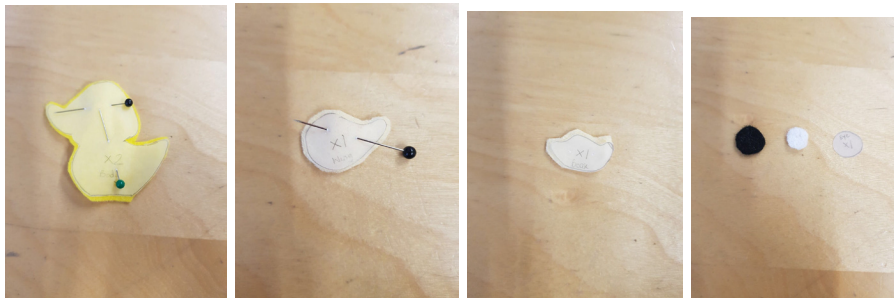

Step 1:

Firstly you need to get your sheet of tracing paper and draw out your templates then cut them out.

Step 2:

Pin your tracing paper templates to the appropriate coloured felt and cut out the shapes. This step can be tricky so you may need an adult to help you.

Step 3:

Using fabric glue or a needle attach your wing, beak and eye to the front of your duck.

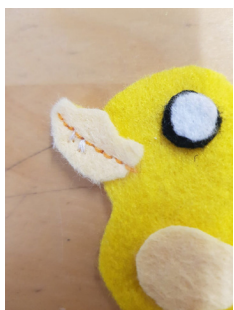

Step 4:

Next stitch on a mouth in orange thread.

Step 5:

After that, stitch or add white beads for teeth.

Step 6:

Once you have done this, use red thread to stitch blood onto your duck.

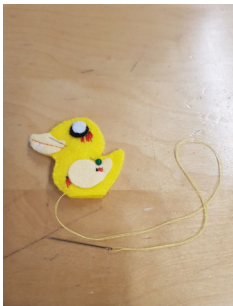

Step 7:

Then add little black stitches for bullet holes.

Step 8:

Once this is complete, stitch round the edge of the two body pieces (wrong sides together) leaving the bottom of the duck unstitched.

Step 9:

Stuff a little bit of wadding into the hole at the bottom of the duck so that it becomes 3D.

Step 10:

Sew up the bottom of the duck.
